

Marketing Performance Report

Campaign: Q1 SaaS Growth - ProProject Tool

Reporting Period: Jan 1, 2024 – March 31, 2024

Executive Overview

The Q1 Google Ads campaign for ProProject focused on capturing high-intent "Project Management Software" search traffic. We successfully decreased CAC by 14% while scaling lead volume through aggressive bidding on competitor keywords and refined negative keyword lists.

TOTAL SPEND

\$42,500.00

↑ 5% vs Prev Quarter

CONVERSIONS (SIGN-UPS)

1,180

↑ 22% vs Prev Quarter

AVG. CTR

4.12%

↑ 0.8% Benchmark

ROAS

3.8x

Target: 3.5x

Key Success Metric: CAC

Customer Acquisition Cost (CAC): \$36.02

Our target CAC for the SMB tier is \$45.00. By optimizing landing page load speeds and refining ad copy for "Pricing" related queries, we have achieved a highly efficient acquisition funnel.

Channel & Ad Group Performance

The Search Network remains our strongest driver for high-intent conversions, while the Display Re-marketing campaign is crucial for converting users who abandoned the sign-up flow.

Ad Group	Clicks	CTR	Conv. Rate	Cost / Conv.
Core Keywords (PM Tool)	12,400	5.20%	8.4%	\$28.50
Competitor Conquesting	8,900	2.85%	4.2%	\$52.10
Enterprise Solutions	3,200	1.90%	3.1%	\$88.00
Remarketing (Display)	15,600	0.45%	2.2%	\$18.20

Conversion Funnel Analysis

[Visual: Funnel Graphic - 40,100 Impressions -> 1,180 Conversions]

Top Performing Search Terms

- "Best project management for remote teams" (12% Conv. Rate)
- "Alternative to [Competitor Name]" (9.5% Conv. Rate)
- "SaaS project tracking free trial" (15.2% Conv. Rate)

Strategic Recommendations

1. Shift Budget to "Core Keywords"

The "Core Keywords" ad group is delivering a Cost per Conversion of \$28.50, significantly below our \$45.00 target. We recommend increasing the daily budget for this segment by 20% to capture untapped evening/weekend traffic.

2. Improve Enterprise Landing Page

The Enterprise segment has the highest CAC (\$88.00). Heatmap data suggests users are bouncing at the "Schedule a Demo" form. We recommend testing a "Lite" version of the form (name and email only) to increase top-of-funnel volume.

Q2 Forecast

Based on current trends, we anticipate the following for the next 90 days:

Projected Spend	\$50,000
Projected Conversions	1,450
Target ROAS	4.0x
